# TELL ME ABOUT YOUR PROJECT AND HOW I CAN HELP!

Here's what I offer:

## **Film Composer**

I create cinematic scores and emotionally rich compositions tailored to enhance your film, commercial, or multimedia project. My work blends classical influences with modern production techniques for a truly immersive experience.

## **Sound Designer**

I design custom soundscapes, effects, and textures to give your project a distinct auditory identity. Whether it's crafting atmospheres or fine-tuning audio details, I bring a creative edge to your sound design needs.

## **Vocal Recording**

Need a singer for your project? I provide professional lead and background vocals, fully edited, named, organized, and delivered as stems.

## **Screenwriting**

I write compelling and emotionally resonant scripts for film and television. Whether it's a character-driven drama or an action-packed thriller, I craft stories that resonate, with engaging dialogue, plot twists, and depth.

I'd love to collaborate on your project and help bring your vision to life.
